Cloud and Data Centre

Size the workload alongside resources, connectivity and operating responsibilities.

Resource planning

Application dependencies, concurrent users, CPU, RAM, storage and expected growth.

Service separation

Resource rental, operating-system and application maintenance, monitoring and backup are separate items.

Data location

Primary and backup data locations are verified for the selected service; infrastructure-provider documentation is reviewed against its scope.

Acceptance and migration

Data validation, access, application tests, downtime window and rollback decision.

Total cost

Setup, resources, licences, traffic, backup retention, support and exit conditions are assessed together.

This document summarises the scope for a service discussion. It does not establish a fixed price, certification, numerical SLA or outcome guarantee. Binding scope is defined in the quotation and contract.
